---

PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on experience supporting Microsoft Purview data protection and compliance workflows in a SecOps environment. Experience includes configuring and testing Data Loss Prevention (DLP) policies, sensitivity labels, Sensitive Information Types, role-based access controls, audit-log reviews, Communication Compliance, and eDiscovery workflows. Foundational knowledge of information security risk management, ISO/IEC 27001, and the NIST Cybersecurity Framework (NIST CSF). Seeking a GRC Analyst or Information Security & Compliance Analyst role focused on risk, controls, data protection, and compliance.

CORE SKILLS

GRC & Risk: Information security risk fundamentals, security controls, risk identification, compliance awareness, security awareness

Frameworks & Standards: ISO/IEC 27001 (foundational knowledge), NIST Cybersecurity Framework (NIST CSF; foundational knowledge)

Microsoft Purview: Data Loss Prevention (DLP), Sensitivity Labels, auto-labeling, Sensitive Information Types (SITs), Communication Compliance, eDiscovery

Identity & Access: Role-Based Access Control (RBAC), least privilege

Security Operations: Audit-log review, user-activity monitoring, data classification, security policy testing

Technical Foundations: Cybersecurity fundamentals, networking, Linux fundamentals, ethical hacking

PROFESSIONAL EXPERIENCE

SecOps Intern | Xencia Technology Solutions Pvt. Ltd. | February 2026 – April 2026

- Implemented and tested Microsoft Purview Endpoint Data Loss Prevention (DLP) policies to help restrict unauthorized sharing of sensitive data.
- Configured DLP controls for Indian customer data protection and supported adherence to applicable regulatory requirements.
- Reviewed audit logs and monitored user activity to support compliance monitoring and investigation workflows.
- Created and managed role-based access permissions aligned with least-privilege principles.
- Developed and tested sensitivity labels and auto-labeling policies for structured data classification.
- Created custom Sensitive Information Types (SITs) to detect employee IDs and phone numbers.
- Configured Communication Compliance policies to identify potentially inappropriate or risky communications.
- Created eDiscovery cases and performed search and investigation workflows.
- Explored governance, risk management, data protection, and compliance framework practices.

PROJECTS

RiskForge — Data-Driven Risk Analysis for the Finance Sector

Academic project concept for a risk intelligence platform covering financial and IT/cyber risks, with risk scoring, dashboards, risk classification, and alerts. Intended to support risk identification, assessment, and monitoring.

EDUCATION

BSc Cybersecurity, Ethical Hacking & Data Analytics

Yenepoya University (YIASCM), Mangalore, Karnataka | 2023–2026

CERTIFICATIONS & TRAINING

- CompTIA Security+
- Google Cybersecurity Certificate
- Networking Fundamentals
- Cybersecurity Foundations: GRC
