PROFILE

Cybersecurity professional with a strong foundation in security operations, ethical hacking, and risk management, backed by hands-on experience in Microsoft Purview and cybersecurity projects. Skilled in identifying security risks, analyzing threats, and applying practical security controls. Seeking a Cybersecurity Engineer role to strengthen my technical expertise while building toward a long-term career in Governance, Risk, and Compliance (GRC).

EXPERIENCE

SECOPS INTERN

Xencia Technology Solutions Pvt. Ltd

February 2026 - April 2026

- Implemented and tested Endpoint Data Loss Prevention (DLP) policies to restrict sensitive data sharing.
- Configured DLP controls for Indian customer data protection, enhancing adherence to regulatory requirements.
- Conducted audit log reviews and monitored user activity to ensure compliance with regulatory standards.
- Created and managed user roles using RBAC aligned with least privilege principles.
- Developed and tested Sensitivity Labels with auto-labeling policies for structured data classification.
- Designed custom Sensitive Information Types (SITs) for detecting employee IDs and phone numbers.
- Configured Communication Compliance policies to detect inappropriate or risky communications. Performed eDiscovery case creation, search, and investigation workflows.
- Explored compliance domains including data protection, risk management, and governance frameworks to identify best practices.
